

System 7

1. Pre-inspection - Identify carpet fibre, construction, history and soiling.

2. Power Vacuum - Remove all insoluble dust and hairs etc. Move furniture if applicable.

3. Stain Removal - Attempt stain removal to identified areas with appropriate techniques.

4. Combination - Rotary agitation.

5. Neutraliser rinse - Rinse and extract all broken soils in fibres with appropriate rinsing solution to ensure correct PH level of fibres.

6. Clean the edges - Clean all edges and hard to reach areas.

7. Rotary absorption - Absorb and warm carpet fibres to remove as much excess moisture as possible to speed drying.

8. Check bonnet - Inspect bonnet to ensure complete removal of soil.

9. Move Furniture - Place furniture on protective blocks or pads to prevent dye transfer.

10. Set pile - Lay fibres flat to speed drying.

● Residential, Commercial & Tenants ● Stain & Soil Resisting Protection ● Leather Cleaning – Rug Cleaning ● All services, guaranteed and fully insured
